

Hywel Dda
University Health Board
Foundation Programme Year 2
Updated: September 2020

Welcome to West Wales

West Wales provides a wonderful lifestyle opportunity, each of our major sites in Hywel Dda are in coastal areas with beautiful beaches and spectacular mountains within easy reach. Exciting leisure pursuits such as surfing, mountain biking, fishing, sailing, hiking and walking are all available in this locality, famous for its outstanding natural beauty.

The Health Board serves a total population of around 385,615 throughout the counties of Carmarthenshire, Ceredigion and Pembrokeshire.

Working at Hywel Dda University Health Board

The Health Board links with Aberystwyth, Swansea, Cardiff and Bangor Universities, as well as having a good working relationship with the National Library of Wales. Many of our Consultants are affiliated Lecturers, Senior Lecturers and Associate Professors.

Knowledge and Library Services

Hywel Dda University Health Board Library & Knowledge Services offer a wide range of resources, both print and online, and services to all Health Board Staff, Trainees and Students on placement.

Each Library is managed by a qualified Librarian and our friendly and knowledgeable staff are here to support your information needs for patient care, education, quality improvement and research.

Carmarthen

Carmarthen is an attractive town set on the banks of the River Towy with stunning landscapes and scenery, nestled between Pembrokeshire and the Gower Peninsula. Explore the idyllic coastline of Carmarthen Bay in the west, the beautiful Brechfa Forest at the centre, and the mountains of Brecon Beacons National Park in the east. Discover historic towns such as Laugharne, which inspired the work of Welsh poet, Dylan Thomas and explore the beautiful National Botanic Garden of Wales.

Glangwili Hospital

Glangwili General Hospital, located in Carmarthen, is the largest of the four main hospitals in Hywel Dda University Health Board. The hospital provides emergency medicine, general surgery, trauma and orthopaedics and general medical services. Diagnostic and therapies, radiology, midwifery, woman and children's services are also available here.

Glangwili hospital also provides:

- A purpose-built Emergency Unit for emergency admissions.
- The Clinical Decisions Unit providing the highest standard of care for acutely sick patients
- A large modern Adult Critical Care Unit
- Stroke Unit with a dedicated stroke team
- Core cardiac services for the population of Carmarthenshire
- Gastrointestinal bleed services for the southern area of the University Health Board.

Transport Links

Carmarthen offers excellent transport links with close proximity to the M4. There are good road and rail links to Pembrokeshire in the west and Cardiff and England to the east.

Rotations – Master List

August 2021 to July 2022

The Programmes we have to offer are summarised below and detailed on the following pages. There are three vacancies per programme (A, B and C) which create the listed placements each in a different order.

F2 posts at Glangwili General Hospital (highlighted in blue)

Educational & Clinical Supervisors:

Dr Abhaya Gupta

General Surgery/ Upper GI	Glangwili General Hospital, Carmarthen
Programmes:	70C
Band 2B – 50%	Rota is 1:5
<p>Elective and emergency management of surgical patients (general/upper GI/colorectal) in a typical district general hospital. Particular emphasis on minimal access surgery and endoscopic intervention. Management of critically ill surgical patients.</p> <p>This post offers rounded experience in General and Colorectal surgery across the breadth of speciality. The post also provides experience in assessment and management of emergency surgical and Critically Ill Surgical patients. Under clinical and educational supervision of experienced consultants, the doctor will have opportunities to achieve appropriate competencies and is encouraged to participate in Service Improvement Projects.</p> <p>Post-holder is part of 5 FY1 doctors supported by ANPs, F2/CTs and Registrars under close supervision of Consultants. The work pattern comprises a combination of normal day, Day and Night On-calls on a fully compliant rota.</p> <p><i>*Post-holder could be required to work across GGH and PPH to optimise their training experience. ^ The rota is being reviewed and could be updated prior to commencement of the post.</i></p>	
Educational Meetings:	<p>Weekly</p> <p>F2 Teaching and 1 F2 study day per rotation</p> <p>Lunchtime Surgical teaching.</p> <p>Surgical MDT Wednesday mornings and Friday afternoons</p>
Educational & Clinical Supervisors:	Mr Ken Harries

General Medicine/Cardiology	Prince Philip Hospital, Llanelli
Programmes:	71A
Band 1B – 40%	Rota is 1:20
<p>The team is led by two consultants and consists of two Specialty doctors, 1 x IMT, 1 x Clinical Fellow an FY2 and FY1 trainee.</p> <p>Juniors are expected to attend 4 consultant-led ward rounds per week and one middle grade led ward round. The patient mix is predominantly cardiology and general internal medicine.</p> <p>Our foundation doctors together with the team, will look after a total of 24 patients on the general cardiology ward but also be involved in the care of 4 patients on CCU. Foundation doctors currently attend a daily ward round in the new ACS treat and repatriate bay catering for acute cardiac patients across the Health board awaiting invasive management at the Morryston Cardiac Centre. This is a very valuable teaching opportunity within the setting of urgent cardiology.</p>	

Plans for a full-time ANP to support the foundation/ junior doctors are in place and imminent.

Foundation doctors will be carrying out daily tasks such as core bedside procedures, completing electronic medication take homes and discharge summaries. We have at least two teaching rounds per week where foundation doctors are encouraged to present and discuss cases. The on-call commitment is 1:20 with prospective cover, the foundation doctors will have a mix of on-call responsibilities between clerking patients through the acute medical admissions unit for a largely unselected medical take to providing general ward cover. The foundation doctors are always supervised by a middle grade and consultant during on-call. Trainees are encouraged to attend cardiology clinics, non-invasive and invasive cardiac investigation lists for their own interest and education

Educational Opportunities	Weekly F2 Teaching and 1 F2 study day per rotation. Weekly Grand Round, Weekly Departmental Meeting and Journal Club Twice weekly teaching ward rounds Juniors will present cases and a discussion will follow regarding the diagnosis and management Weekly cardiology team meetings where juniors can choose and present topics for discussion
Educational & Clinical Supervisors	Dr Lena Izzat

General Practice	Avenue Villa, Llanelli
Programmes:	71B
Band 1B 40%	Rota is 1:7
<p>Duties include primary care clinic based and procedure based where applicable such as patient assessment, review and management of both acute and long term conditions.</p> <p>Duties and activities suited to clinical sessions</p> <ol style="list-style-type: none"> 1. Supervised or supported consultations within the practice, with a minimum appointment length of 15 and most commonly of 20 minutes for face to face consultations. There will be adequate time provided for at the end of any consulting period to allow a trainee to debrief with the supervising GP. 2. Supervised or supported home visits, nursing home visits, community hospital duties including time for debriefing, and travelling. 3. Administrative work that directly and indirectly supports clinical care, which includes: reviewing investigations and results, writing referral letters, acting upon clinical letters, preparing reports, general administration. 	

4. Time spent with other members of the practice and healthcare team for the purposes of care and learning e.g. practice nurses, community nurses, nurses with a role in chronic disease management, receptionists, triage nurses, etc.

5. Time spent with other healthcare professionals who are encountered in primary care e.g. ambulance crews, school nurses, midwives, occupational therapists, physiotherapists, counsellors, to gain a necessary understanding of working relationships within primary care.

6. Time spent with dispensing and pharmacy professionals gaining experience in these areas, especially where a trainee might have duties that require training to be able to assist with dispensing duties, for example.

Educational Meetings:	<p>Daily Surgery consultation Home Visits/Review</p> <p>Weekly FY2 Teaching MDT Meeting</p> <p>Monthly Whole Hospital Audit Meetings held regularly F2 Study Days – 1 per rotation</p>
Educational & Clinical Supervisors:	Dr Bridget Gwynne

General Medicine/ENT	Glangwili General Hospital, Carmarthen
Programmes:	71C
Band 2B – 50%	Rota is 1:5
<p>The ENT department in West Wales provides the full range of ENT services to a widely dispersed largely rural population. There are three FY2 doctors and 1 FY1 doctor working with a core surgical trainee and GPST at first on-call level. The junior tier is supported by six registrar level doctors including one higher surgical trainee in ENT, and six consultant ENT surgeons. We have a very strong team working ethos and all doctors work closely together and provide support for colleagues as needed. Duties consist of management of elective and emergency inpatients on the adult ENT and paediatric wards. The on-call rota for F2 doctors covers emergency ENT admissions until 8:30pm weekdays and weekends, with cross-cover for ENT and urology admissions overnight. The F1 doctor gains experience in managing general surgical admissions on-call.</p> <p>Our department is well staffed with junior doctors which allows ample opportunity for foundation doctors to attend outpatient clinics and spend time in the operating theatre. In addition to gaining the generic competencies required of all doctors we encourage our</p>	

trainees to improve their experience of outpatient management of common ENT conditions, and many Foundation doctors have been able to start a logbook of surgical cases they have been involved in. This time in theatre stands them in good stead when applying for further training jobs. A significant proportion of our patient group is aged less than 18 which provides paediatric exposure for those doctors considering a career in paediatric medicine or general practice.

Educational Meetings:	<p>Weekly F2 Core Curriculum teaching. F2 Study Days – 1 per rotation ENT Department teaching Teaching on ENT and urology emergencies at the start of placements to prepare for on-call commitments. On-going educational support for doctors in their daily work. Medical student teaching for students on attachment and this provides an opportunity for foundation trainees to develop their own teaching skills. We fully support the attendance of our foundation doctors in the regional foundation training days and encourage them to complete ALS, ILS and, where relevant PSA courses. The ENT department also has developed close links with other departments and primary care for the purpose of arranging taster days in other specialties should this be required.</p>
Educational & Clinical Supervisors	Mr Antony Howarth

General Medicine/ Gastroenterology	Prince Philip Hospital, Llanelli
Programmes:	72A
Band 1B – 40%	Rota is 1:5
<p>This post offers the opportunity to be part of a friendly and dynamic team of gastroenterology consultants, Dieticians and specialist nurses. The trainee will have the opportunity to have exposure to, and be involved in the active management of a wide range of luminal and hepatology related conditions that are seen as an in-patient in Prince Phillip Hospital including complex inflammatory bowel disease, Decompensated liver disease, Gastrointestinal malignancies and advanced nutritional related pathologies. The trainee will benefit from regular consultant ward rounds and bed side teaching that will build knowledge and clinical reasoning. All members of the team are encouraged to seek out educational opportunities in particular attending outpatients to both observe and see patients themselves. Specialist clinics run regularly in PPH including complex IBD, Liver disease comprising of viral hepatitis and post liver transplant follow up alongside general gastroenterology referrals. There will also be an opportunity to attend the endoscopy</p>	

department to observe both Upper and lower Gastrointestinal endoscopy which will include therapeutics, and all trainees are expected to complete the attachment being competent in performing abdominal paracentesis. Alongside their usual ward duties the junior doctor will also be part of the general medical rota and have the opportunity to see acutely unwell medical patients being admitted to the acute medical assessment unit while being a part of the Medical emergency Team (MET) and attending acute stroke thrombolysis calls.

Educational Meetings:	<p>Daily Consultant Ward Rounds</p> <p>Weekly Medical Journal Club FY2 Teaching Grand Rounds Department Teaching</p> <p>Monthly Whole Hospital Audit Meetings held regularly FY2 Curriculum Teaching days (1 per rotation)</p>
Educational & Clinical Supervisors:	Dr Ian Rees

We fully support the attendance of our foundation doctors in the regional foundation training days and encourage them to complete ALS, ILS and, where relevant PSA courses. The ENT department also has developed close links with other departments and primary care for the purpose of arranging taster days in other specialties should this be required.</p>
Educational & Clinical Supervisors	Mr Antony Howarth

Obstetrics & Gynaecology		Glangwili General Hospital, Carmarthen	
Programmes:	72C		
Band 2b – 50%	1 in 11 European time directive compliant Rota.		
<p>Foundation trainees are able to join the busy team at the department of Obstetrics and Gynaecology where there are 3200 maternity delivery per annum and 6000-8000 gynae referrals. There are also plenty of opportunities to gain experience in both obstetric and gynae emergencies on the Labour Ward, Antenatal/ Post Natal Ward, Gynae Ward, elective caesarean list and elective gynae theatre. There is an opportunity to attend out-patient clinics of both obstetrics and gynae and to develop clinical skills in the Specialty such as obtaining history, clinical examinations, interpreting results and to formulate management plans. There is also the chance to attend special interest clinics such as hysteroscopy, colposcopy, urodynamics, early pregnancy and antenatal day assessment unit depending on the availability. Foundation Doctors on call during the night are supported by the night Nurse Practitioners as well as direct Registrar supervision. Foundation Doctors attend the Ward round which are supervised by Senior team members. Also, they have an opportunity to attend the MDT meeting and Risk Management meetings.</p>			
Educational Meetings:	<p>The department has an excellent teaching environment with regular departmental teaching every Wednesday afternoon. There is an opportunity to do presentations and at the same time, participate in audits and other educational activities.</p>		

	<p>Weekly F2 teaching and F2s are regularly released for their foundation study days (1 per rotation). The department has Medical Students both from Cardiff and Swansea, and Foundation Doctors are encouraged to get involved with their teaching. There is monthly PROMPT training and Foundation Doctors are given the chance to attend these as well.</p>
Educational & Clinical Supervisors:	Dr Islam Abdelrahman

General Medicine/Diabetes & Endocrinology	Prince Philip Hospital, Llanelli
Programmes:	73A
Band 1B – 40%	Rota is 1:22
<p>The Team consists of 2 x SPR, 2 x SHO, 1 x FY2, and 1FY1. Juniors are expected to turn up a little earlier in turns (8.45 am) to update the list for ward round. The doctor who comes in at 0845 can leave at 16.45. Ward round usually starts at 9 am. All members of the team attend the ward round and try to complete urgent jobs as they go around and keep the board up to date with jobs for the nurses. Trainees then continue with jobs, chase results and review patients as required until 5pm. It is important to handover any urgent test results or unwell patients to evening SHO/SPR between 4.30pm - 5pm. It is expected at the beginning of the rotation or if possible before starting, to express any planned annual or study leave with the team and rota co-ordinator. This will be granted as per staffing levels. Audit and service development ideas are welcomed in addition to the journal club participation. There will be an opportunity to attend diabetes and endocrine outpatient clinics if interested. On-calls as per rota with senior supervision On-calls as per rota with senior supervision.</p>

Trauma & Orthopaedics	Glangwili General Hospital, Carmarthen
Programmes:	76C
Band 1B – 40%	Rota is 1:11 on call days and night shifts. T&O only, no cross cover with other specialties
GGH is a busy district general hospital which admits general and specialty trauma from across the entire health board. 350-400 hip fractures are admitted per year. We are the designated trauma unit for Hywel Dda within the South Wales Major Trauma Network. There are 2 F2 doctors, 8 Trust grade core trainees, and a surgical scrub practitioner on the SHO level rota. There are 10 middle grade doctors, including 2 higher surgical trainees and 11 consultants undertaking a 1:8 on call. We also have 3 specialist trauma nurses and a consultant physician with an interest in Peri-operative care. We have strong links with Swansea and Cardiff universities and encourage involvement in research and quality improvement activities. Our department ensures appropriate clinical and educational supervision for all junior medical staff and this post prepares all junior doctors well for whichever training programme they wish to apply for.

Educational & Clinical Supervisors	Dr Stamiatos Zouras

General Medicine/Cardiology	Glangwili General Hospital, Carmarthen
Programmes:	78A
Band 1B- 40%	Rota is 1:11
<p>The F2 is an integral part of the Cardiology team in GGH, working with an F1, Clinical Fellow/IMT/ANP (2 posts) an SPR and a specialty doctor. The team is led by 4 cardiologists who provide daily input to the wards and CCU. The team look after 6 patients in CCU, 6 in the cardiac step-down unit and 10 on Towy Ward (with occasional outlying patients). The junior doctors are given the opportunity to spend time gaining experience in ECG interpretation, basic echocardiography, basic pacing and angiography. More senior doctors are trained in some of the advanced techniques and the junior doctors are encouraged to develop a better understanding of these.</p> <p>F2s take part in a 1:11 on-call rota where they will be on-call with either an F1 or F2 and a middle grade. A 'twilight' doctor helps in the evenings. There is also a night nurse practitioner on at night to support. There is a consultant presence from 8am-8pm Monday to Friday and for much of the weekend. There is always a consultant on-call from home who is available 24/7.</p> <p>The F2s are supported to attend educational events in the postgraduate department and are given careers advice and support from the consultants. They are also supported to fulfil the curriculum requirements.</p>
