

Hywel Dda University Health Board

Foundation Programme Year 2

Updated: [September 2020]

Welcome to West Wales

West Wales provides a wonderful lifestyle opportunity, each of our major sites in Hywel Dda are in coastal areas with beautiful beaches and spectacular mountains within easy reach. Exciting leisure pursuits such as surfing, mountain biking, fishing, sailing, hiking and walking are all available in this locality, famous for its outstanding natural beauty.

The Health Board serves a total population of around 385,615 throughout the counties of Carmarthenshire, Ceredigion and Pembrokeshire.

Working at Hywel Dda University Health Board

The Health Board links with Aberystwyth, Swansea, Cardiff and Bangor Universities, as well as having a good working relationship with the National Library of Wales. Many of our Consultants are affiliated Lecturers, Senior Lecturers and Associate Professors.

Knowledge and Library Services

Hywel Dda University Health Board Library & Knowledge Services offer a wide range of resources, both print and online, and services to all Health Board Staff, Trainees and Students on placement.

Each Library is managed by a qualified Librarian and our friendly and knowledgeable staff are here to support your information needs for patient care, education, quality improvement and research.

Haverfordwest Withybush General Hospital

Withybush Hospital is a modern District General Hospital with approximately 218 beds and is the only hospital serving Pembrokeshire residents and holiday makers year round. We have 6 operating theatres including a Day Surgery Unit, Emergency and Urgent Care Centre and Adult Clinical Decision Unit (ACDU) and a Renal Unit. Our Endoscopy suite is the 3rd unit to receive JAG accreditation in Wales. A Haematology & Oncology unit opened in January 2017.

The medical department has a ward based model which provides an opportunity to work in a multi-disciplinary team with engaged physicians. We have recently appointed 2 Care of the Elderly Consultants and an Ortho-geriatric Consultant which has enhanced the department.

Withybush also contains 3 surgical wards, a general surgical, orthopaedic, gynaecological ward as well as ITU and HDU facilities, Paediatric Ambulatory Care Unit (PACU) and a Midwifery Led Unit.

The F2s in the Emergency Medicine/surgery/Care of the elderly rotation, will have opportunity to join the Coastal Medicine programme, working with the RNLI (Lifeboats and Lifeguards. F2s

would continue to learn medical, communication and educational skills, via a realistic, team-based approach to the pre-hospital management of casualties.

The Medical Education department consists of 6 members of staff who have created an educational environment that nurtures and develops doctors for the future. We deliver quality training standards by harmonising service and teaching to maximise all the educational opportunities within the clinical setting. We have a culture at Withybush of educators supporting and developing doctors as

trainers and provide continual professional development opportunities to all of our doctors and dentists.

Withybush Hospital has a robust teaching and training programme providing the Foundation curriculum and departmental teaching on a weekly basis along with ward-based teaching.

As winners of the Paul Bradley Prize for Excellence in Clinical Skills Training, we pride ourselves in providing a safe environment for undergraduate, postgraduate, team and inter-professional simulation and skills training. Our Clinical Skills tutor facilitates various skills teaching using our wide range of manikins with assistance of senior doctors and simulation training with our Leardal Simman in the skills lab as well as in-situ in A&E and on the wards.

The Withybush Library offers support and advice with multi-disciplinary resources and aim to provide an equitable service to all employees and students on placement. The library, IT room and clinical skills lab have 24hr access and the whole site has The Cloud as its Wi-Fi provider.

There are 2 Doctor Mess rooms, one located in the hospital and the other in an accommodation block. Every year a Mess committee is assembled to provide a voice for the junior doctor in training at a Health Board level as well as organise social meetings and functions to support new doctor in Withybush.

We have medical students from both Cardiff and Swansea University whom of which are all eager to learn from both foundation and senior doctors.

Hospital Provided Accommodation

F2s in the hospital are offered accommodation at a very reasonable rate.

Rotations – Master List

August 2021 to July 2022

The Programmes we have to offer are summarised below and detailed on the following pages.

There are three vacancies per Programme (a, b and c) that will undertake the listed placements each in a different order.

F2 posts at Withybush General Hospital

Programme	Placement 1	Placement 2	Placement 3
F2/79a	General Surgery	Emergency Medicine	Obs/Gynae GGH

Psychiatry	Bro Cerwyn, Haverfordwest
Programmes:	F2/116b
<p>This post offers an exciting and unique opportunity for a F2 doctor to work in psychiatry in beautiful rural West Wales. We are currently undergoing a radical transformation of our mental health services with a focus on developing a modern and accessible mental health service fit for the changing needs of our population.</p> <p>A particular focus is the development of a liaison psychiatry service for the district general hospital. The F2 doctor will contribute to the development of the liaison service. There will be an opportunity to contribute to multi-professional and multi-agency discussions as we continue to develop the service. The doctor will have the opportunity to lead on a particular area of service improvement relevant to the liaison service.</p> <p>Evaluation will be by audit, reflection and e-portfolio.</p>	
Educational Meetings:	<p>Half day per week self-development time and we offer many learning opportunities in various subspecialties throughout the directorate including older adult, learning disabilities, CDAT, psychological therapy, liaison and more.</p> <p>Mon AM Ward business meeting and clinical reviews. PM Clinical reviews/ward duties</p>
